achieve the winning look
with albedor cabinet doors

effective 1st December 2013

Achieve the winning look with **Albedor** cabinet doors

OUR COMMITMENT TO QUALITY

Albedor Industries Pty Ltd Code of Ethics

At all times, customers will receive prompt, courteous service, and value for money.

We aspire to provide the highest standard of design, workmanship and service.

We provide a safe and friendly work environment.

Strict adherence to recognised industry practices.

Constant commitment to design and product development.

Quality

Albedor Industries is an Australian family business which has been manufacturing quality cabinet doors and panels since 1979.

At Albedor, we've built our success on a simple philosophy: never compromise on quality and style.

The use of materials of excellent quality combined with the latest technology, enable Albedor to produce Ultra Finish doors and panels to an exceptional standard.

Albedor is well known in the cabinet making industry for our stable lead times and consistent output, which makes it an attractive proposition for cabinet makers, builders and architects who need to know their products will be available on time, as planned.

Guarantee

Albedor Industries Ultra Finish doors are covered by an express warranty in the terms below.

This warranty is provided by Albedor Industries Pty Ltd (“Albedor”) ACN 007 136 521. The benefits under this warranty (including its express duration) are in addition to and not intended to limit any other rights or remedies of consumers under a law in relation to which the warranty relates.

Albedor Industries Pty Ltd warrants that the door product is substantially free from defects for a period of 7 years from the date of first installation of the door. To the extent permitted at law, and subject to the following paragraph, Albedor Industries will, at its election repair or replace goods that are defective.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to replacement or refund for a “major failure” and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if goods fail to be of acceptable quality and the failure does not amount to a major failure.

The term “major failure” is defined in the Australian Consumer Law and includes but is not limited to where the goods are substantially unfit for the purpose for which such goods are commonly supplied and cannot easily and within a reasonable time be remedied to make them fit for such a purpose, or where the goods are unsafe.

The warranty does not cover defects or problems that arise due to you or any person installing the product (other than Albedor) causing the product to become of unacceptable quality, such as failure to take reasonable care of the product or damage caused by abnormal use or installation of the product.

For warranty to be honoured you must:

- Contact Albedor Industries by mail, phone or email as follows:
7 Research Drive, Croydon South Vic 3136
PO Box 1264 Croydon Vic 3136
Ph: 03 9761 6330
email: albedor@albedor.com.au
- Submit proof of purchase: and
- Bear the costs associated with making the warranty claim (such as the sending in of proof of purchase).

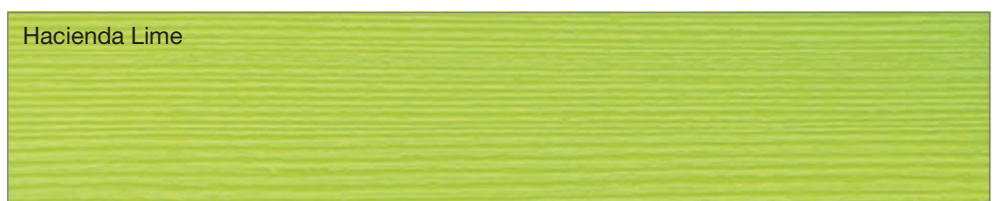

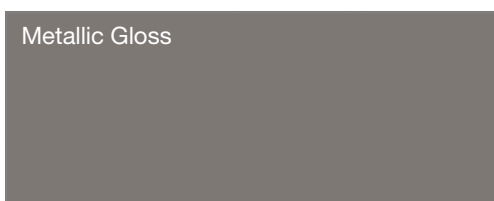

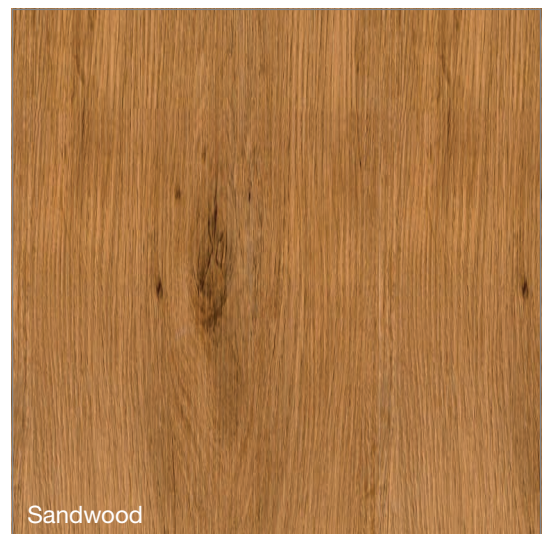

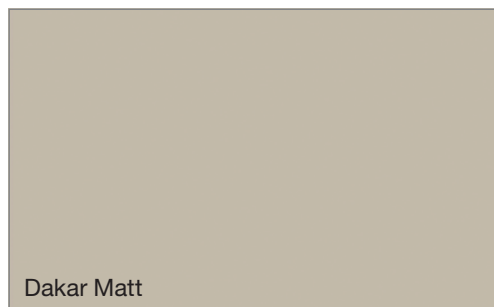

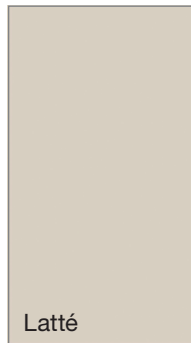

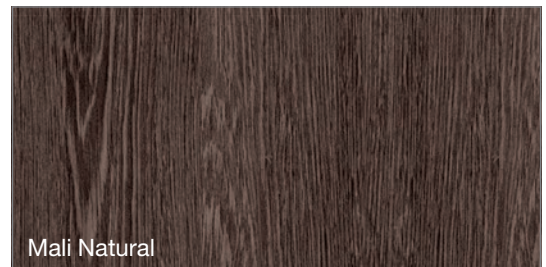

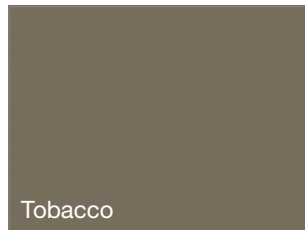

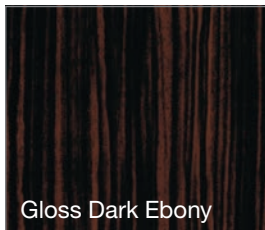

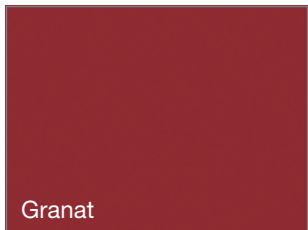

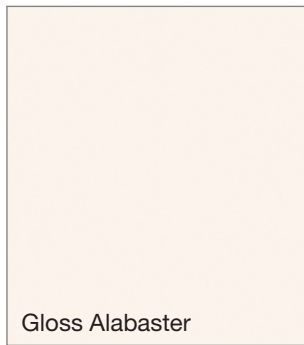

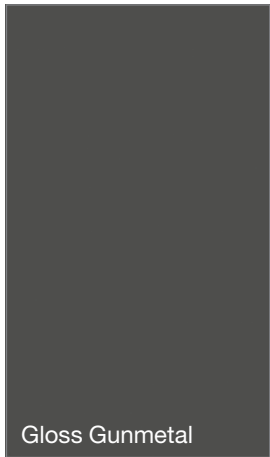

We will then make a determination as to refund, replacement or repair in accordance with the above.

Colours and Finishes

inspire | select | create

Albedor offers a vast range of the latest colours and design trends. As the colour range is regularly updated, please visit the Albedor website for the complete current range of colours and finishes. Ultra Finish doors and panels are available in plain, printed, satin, matt, fino, organics, plain gloss, gloss metallic and gloss printed finishes.

Ultra Finish Doors & Panels

inspiration for kitchens,
bathrooms, laundries
and furniture

Ultra Finish is manufactured utilizing advanced PUR Laminating Technology, and features a flawless finish and crisp square edge detail.

Albedor's Ultra Finish range reflects contemporary design, available in colours and textures ranging from earthy tones, inspiring woodgrains, classic styles and rich gloss colours.

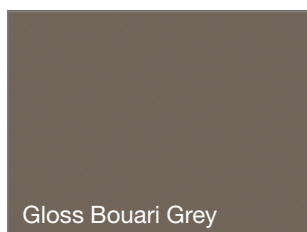

Ultra Finish doors and panels are edged with exact match edging exclusive to Albedor, or alternatively select from our range of feature contrast edging options.

Ultra Finish can be processed up to 4000mm in length (5400mm sheets available on request) and on a variety of thicknesses of MDF substrate. Ultra Finish doors and panels are suitable for vertical use in residential and commercial projects.

a clever refurbishment
breathes new life into
an old victorian

Ultra Finish doors and panels in 'Gloss Gunmetal' were used on all of the cabinetry and are the perfect foil to the acid bright accent pieces used throughout this area. The floating cabinetry is accented with a combination of hidden under bench lighting as well as natural light sourced through a glass splash back/window to a small courtyard. The island bench is perfectly proportioned within the space and aligns with the feature ceiling.

Organic textures and timber grain finishes are the latest in Europe right now and this very stylish kitchen , featuring Ultra Finish doors and panels is right on trend. The pale wintry hue of 'Grey Oak,' used in this five-metre long wall is artfully complemented by black finger pull rails. The range hood finished in textured acrylic paint, was custom designed and is just one of the unique touches used in the design of the kitchen. The marble waterfall bench tops, aluminium kickboards and stainless steel appliances all in shades of grey, add to the sophisticated elegance of the room.

**ultra stylish and understated
elegance in shades of grey**

the
attraction
is in the
contrast

This kitchen features Ultra Finish 'Gloss Gunmetal' with 'Hacienda Black'. The overall design of the kitchen is sleek and creative with the emphasis on maximising storage and minimising clutter. Stainless steel appliances, light grey splashbacks and aged washed timber flooring were added for maximum visual impact. Current kitchen design trends are showing the combined use of gloss with textured finishes as well as contrasting colour combinations. Affordability with a designer look is the perfect partnership and is easily achieved with Albedor's range of quality cabinet doors and panels.

modern lines
sleek and stunning

Ultra Finish doors in 'Gloss Classic White' with Aluline edge detail were chosen specifically for the cabinetry to create the perfect sleek finish, but are also hard wearing and durable. The classic combination of timbergrain and white is complemented by the stainless steel appliances and superb timber flooring. The design of this kitchen exemplifies the use of modern eco-friendly cabinetry finishes without compromising on style and quality.

Albedor Industries – Care & Cleaning

To ensure the appearance of your Albedor Product is maintained to the highest standard, please follow these simple instructions.

Note: Failure to follow any of the instructions will void warranty. **Important Note:** *Care Instructions sheet must be forwarded on to the end user.*

All Albedor products are manufactured from the highest quality materials and designed to provide years of trouble free service. Whilst products are made from a highly Moisture Resistant Medium Density Fibreboard (MRMDF) and as with any wood based panel, cannot be made totally waterproof, care should be taken to wipe up spills immediately, ensuring the doors are not exposed to high or continuous levels of moisture, steam and humidity.

Light Stains

Wipe down using a damp cloth containing warm soapy water. Dry using a soft cloth so as not to leave any water on the door(s). Alternatively, spray surface with Vuplex Plastic Cleaner and Antistatic Polish and wipe over with a Microfibre Cloth.

True Reflections doors and panels can be polished with Albedor polishing liquid and a Microfibre cloth.

Stubborn Stains

For stubborn stains eg. Ballpoint ink, a cotton bud soaked in methylated spirits can be used on the stain area and washed immediately again with warm soapy water.

To ensure that your Warranty will not be void, **DO NOT** use any of the following on doors: Abrasive Cleaners (eg. Ajax, Jif etc), Scouring Pads or Abrasive Papers, Solvents, Thinners, Turpentine (Turps), Ammonia, Bleach, Acetone, Mek and any other cleaning agents containing Organic Solvents or the above mentioned products.

To ensure 100% customer satisfaction, please adhere to the following guidelines for Storage, Maintenance, Design and Installation.

Storage and Maintenance

- Care should be taken to avoid leaning large doors against the wall with other small doors leaning against it, this could cause additional bowing.
- When stacking doors they are to be stacked face to face.
- Care should be taken not to slide doors while hinging as this could scratch the face.
- The protective coating supplied on Albedor products should not be removed until installation is complete to reduce the chance of scratching or damaging.
- Avoid contact with sharp items and objects

Design

Areas where products will be used should be designed so that they are not exposed to steam, direct heat or prolonged humidity. When designing a kitchen, care should be taken so that items are not positioned close to appliances that give off steam (ie. Water jugs) and heat (eg. Cupboard doors and panels close to a gas cooker).

Installation

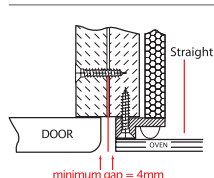

Flush Mounted and Under Bench Ovens with Front Panel Exhausts. Many ovens on the market do not have a fitted 'Baffle' surrounding the oven door, and excessive heat is convected

to the surrounding cabinetry and doors/panels.

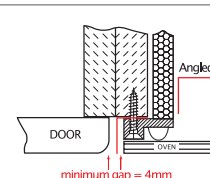

Albedor products are manufactured to meet current European Standards for heat resistance (UNI9242), which requires products to withstand a temperature of 70C for 4hours. When ovens convect heat greater than 70C, it can cause the face material to shrink back or peel away.

Heat deflector strips are available from Albedor Industries to be installed for ovens of this nature (see diagrams below). Failure to install heat deflectors in either method when required will void the warranty.

Method 1

Method 2

Cooktops and Rangehoods

Products should not be installed in close proximity (less than 650mm) to a cooktop. When products are installed around a cooktop in accordance with above, a 900mm DUCTED rangehood exhaust should be installed (recirculating rangehoods are not

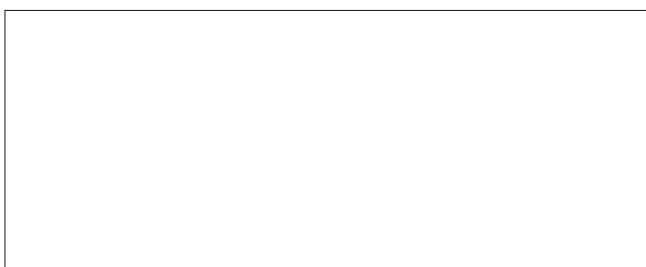

recommended). Hot plates should not be used without the rangehood exhaust fan being switched on. Retractable rangehoods must also be turned on and the panel pulled out to the full extension otherwise they convect heat through the sides and directly onto products.

Appliances such as electric fry pans and portable electric grills should only be used under an activated rangehood exhaust fan. Similarly toasters used in proximity can have the heat build up reduce by activating the exhaust fan. A cool down period is recommended after long use to prevent any heat build up close to doors and panels. Failure to use the rangehood or follow any of the above guidelines will void the warranty on Albedor products.

Use of Melamine Materials for Panels

Please note that when matching different materials such as Melamine Board with Albedor products variations may occur in colour, finish and UV stability. We recommend that where possible, Albedor products are used throughout an installation to achieve a perfect match.
