

# CASTELLA

Fine Architectural Hardware

## Fine Architectural Hardware

Welcome to Castella, the home of sophisticated and beautiful collections of architectural hardware. Be spoilt for choice with ten fine collections made up of eighty individual ranges featuring over 600 handles.

Discover unique and on-trend designs that will impress, as we have one of the largest ranges of European made handles in Australia.

From contemporary to traditional styles, you will find architectural hardware that is both stunning in its aesthetics and functional in its use.

For more information, specifications and images of our products, please visit our website.

## MADERA

Introducing Madera, an exclusive range of timber handles designed and made by Castella in Tasmania. A simple design made from Tasmanian Oak or European Beech, with subtle accents in a variety of finishes, making it a perfect feature handle. Fixings are available in the following finishes; matte black, polished & satin chrome, and polished & brushed gold.

	Description	Finish	Code
A	Handle, 160mm CTC, 210mm OA, 36mm P, 22 x 8mm W	Tas Oak/Matte Black	300.160.04
B	Handle, 224mm CTC, 274mm OA, 36mm P 22 x 8mm W	Tas Oak/Matte Black	300.224.04

## CARING FOR YOUR CASTELLA HARDWARE

Firstly, not all finishes are created equal. Some finishes are designed to retain their original lustre for years; others are created to age and patina over time. Whichever Castella finish you have chosen you can be certain it will add beauty to your home for years to come if you take a little time to care for them.

All finishes should be regularly cleaned with a mild soapy water solution and a soft cloth and wiped dry. To further enhance and protect the finish a non-abrasive furniture grade polish (eg Mr Sheen) can be applied and buffed with a soft dry cloth.

Never use abrasive cleaners or scouring pads on your Castella handles. This may void your warranty.

Stainless steel products will require special care as, depending on the environment they are in, they may develop 'tea staining' over time. Tea staining can occur on all grades of stainless steel and appears as small rust like stains on the surface. It is not a fault of the base material or the finish; rather an indication the surface has become contaminated and left uncleaned. If your Castella product has become heavily stained and normal cleaning processes do not restore the finish, please contact us for advice on correct procedure to clean.

## WARRANTY

Castella proudly offers a lifetime warranty on all its products. We will replace any item free of charge, this covers:

- Defects in materials and workmanship under normal use
- If the finish has broken down or is defective, where adequate care has been taken in cleaning the item. The products must be properly installed and used for the purpose for which they are intended.

The warranty excludes normal wear and tear, and products that have been improperly installed and maintained.

---

## Measurements Key

Key	Description
L	Length
W	Width
P	Projection
OA	Overall Length
CTC	Centre to Centre (distance between screw holes)
D	Diameter
D	Depth
H	Height
